

ABSTRACT OF THE DISCLOSURE

A color toner composition including at least toner particles including at least a binder resin; a colorant and a release agent dispersed in the binder resin; and a titania as an external additive, wherein the colorant has an average dispersion particle diameter not greater than 0.5 μm ; the release agent and the binder resin are insoluble to each other; the toner particles satisfy the relationship: $0.05 \leq D_w/D_4 \leq 0.4$, wherein D_w represents an average dispersion particle diameter of the release agent and D_4 represents a weight-average particle diameter of the toner particles; and the titania has a segregation rate of from 0.5 to 5 %.
